# **Disability insurance**

Disability claims. We're here for you. Protecting your income from the unexpected.

No one expects to become disabled, yet it happens every day and usually without warning. Having disability insurance is an effective way to help protect your lifestyle in the event you are no longer able to earn an income.

## Which injuries and illnesses account for the most disability claims?

Below is a breakdown of the types and relative prevalence of disabilities drawn from RBC Insurance<sup>®</sup> open disability insurance claims received between 2011 and 2013.

#### Group long-term disability insurance

3%	Digestive
9%	Circulatory
<b>9</b> %	Nervous system
<b>9</b> %	Injury
11%	Miscellaneous
15%	Cancer
17%	Musculoskeletal
28%	Mental disorder

### Disability insurance

#### Disability can affect anyone, at any age, any time

Disability affects people of all ages. While the figures in the following charts suggest that a higher proportion of people aged 50 – 59 become disabled, this group also represents the highest proportion of disability insurance policyholders. It's generally assumed that more people become disabled as they age, yet surprisingly almost one in nine individual claims and one in four group claims are made by individuals under age 40. That's all the more reason to consider disability insurance — no matter what your age.

Individual disability insurance	*	Group long-term disability insurance*		
Age when disability occurred	Percentage of claimants	Age when disability occurred	Percentage of claimants	
under 40	11%	under 40	24%	
40 - 49	21%	40 - 49	27%	
50 – 59	42%	50 – 59	35%	
60 plus	26%	60 plus	14%	

\* Based on number of active claims received from 2011 – 2013, for group and individual disability insurance products underwritten by RBC Life Insurance.

## Insurance

RBC Insurance disability claims in 2014		
Approximate number of open individual and group disability insurance claims at the end of 2014	11,066
